Rabbit Anti-Human Fibrinogen Affinity Purified pAb

Catalog No.	CSI19738A CSI19738B	Quantity:	100 µg 1.0 mg
Description:	Fibrinogen (also called Factor I) is a 340 kDa glycoprotein synthesised in the liver by hepatocytes and megakaryocytes. Fibrinogen, the principal protein of vertebrate blood clotting is a hexamer containing two sets of three different chains (alpha-, beta-, and gamma-), linked to each other by disulfide bonds. The N-terminal sections of these three chains contain the cysteines that participate in the cross-linking of the chains.		
Concentration:	10.0 mg/ml		
Gene ID:	2243, 2244, 2266		
Specificity:	Human Fibrinogen		
Host:	Rabbit Serum		
Immunogen:	Full length native purified human fibrinogen		
Isotype:	IgG		
Formulation:	Frozen Liquid in 0.05 M Sodium Phosphate, pH 6.6, + 0.1 M NaCl + 1 mM EDTA		
Purification:	Affinity purified by immobilized human fibrinogen.		
Applications:	ELISA, Capture Antibody, WB. The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	Store at -70°C. Stable for 5 years from delivery. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
