

PLG

Sheep Anti-Human Plasminogen FITC pAb

Catalog No.	CSI19947A CSI19947B	Quantity:	1.0 mg
Alternate Names:	RP1-81D8.1, DKFZp779M0222		
Description:	<p>Plasminogen (PLG) is a circulating zymogen that is converted to the active enzyme Plasmin by cleavage of the peptide bond between Arg-560 and Val-561, which is mediated by Urokinase (uPA/PLAU) and Tissue Plasminogen Activator (tPA/PLAT). The main function of Plasmin is to dissolve Fibrin blood clots. Plasmin, like Trypsin, belongs to the family of serine proteases Fibrin is a cofactor for Plasminogen activation by tPA. Urokinase Plasminogen Activator Receptor (uPAR) is a cofactor for Plasminogen activation by uPA. Plasmin is inactivated by Alpha-2-Antiplasmin, a serine protease inhibitor (serpin).</p>		
GeneID:	5340		
Concentration:	10.0 mg/mL		
Specificity:	Human PLG		
Host:	Sheep		
Immunogen:	Human PLG		
Isotype:	IgG		
Conjugate:	FITC		
Formulation:	Frozen Liquid in 0.05 M Sodium Phosphate + 0.1 M NaCl + 1 mM EDTA pH 6.6		
Purification:	Protein G purified		
Storage & Stability:	Store at -70 C. Protect from light.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
