## **Sheep Anti-Mouse Urokinase Plasminogen Activator Receptor Antiserum pAb**

<b>Catalog No.</b>	CSI19990A	<b>Quantity:</b>	1.0 mL
	CSI19990B		10 mL

**Alternate Names:** Cd87, u-PAR, uPAR

**Description:** Urokinase Plasminogen Activator (uPA) Receptor (uPAR) plays a role in localizing and promoting Plasmin formation, likely influences many normal and pathological processes related to cell-surface Plasminogen activation and localized degradation of the extracellular matrix. It binds both the proprotein and mature forms of Urokinase Plasminogen Activator (uPA) and permits the activation of the receptor-bound pro-enzyme by Plasmin. The protein lacks transmembrane or cytoplasmic domains and may be anchored to the plasma membrane by a glycosyl-phosphatidylinositol (GPI) moiety following cleavage of the nascent polypeptide near its carboxy-terminus. However, a soluble protein is also produced in some cell types.

**Concentration:** Whole Antiserum

**Specificity:** Soluble Mouse uPAR

**Host:** Sheep

**Immunogen:** Soluble Mouse uPAR His Tagged

**Formulation:** Frozen Liquied

**Storage & Stability:** Store at -70°C.

**NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.**
