

Fibronectin Receptor, VLA-alpha-5, clone NKI-SAM1 Monoclonal Antibody

Catalog No.: MON1034

Quantity: 1 ml

Specificity

This antibody recognizes a 150/130 kD receptor for fibronectin, (VLA-alpha-5 protein from the integrin superfamily of antigens). The antibody reacts with platelets, lymphocytes, monocytes and most cell lines including K562 and U937.

Immunoglobulin type

Murine IgG_{2b}

Use

Study of VLA-5.

Instructions for use

Use antibody in fluorescence experiments. It can also be used on frozen sections with acetone fixated tissue use a dilution of 1:20.

Presentation

1 ml PBS-diluted purified IgG with 0.1% sodium azide. Sufficient for 100-200 tests.

Literature

- te Velde, A.A., et al., 1988, J. Immunol. 140, 1548.
