

## **CD120a, TNF-Receptor p55, Biotinylated, clone MR1-2 Monoclonal Antibody**

**Catalog No.:** MON 9062B

**Quantity:** 0.5 ml

### **Specificity**

The antibody reacts with the extra cellular part of the TNF-Receptor p55. It also reacts with the soluble receptor. TNF-Receptor p55 is present on most cell types and is considered to play a prominent role in cell stimulation by TNF: Induction of cytotoxicity and other functions are mediated largely via TNF-Receptor p55.

### **Immunoglobulin type**

Murine IgG<sub>1</sub>

### **Use.**

The antibody is useful for flow cytometry and histology on frozen sections.

### **Instructions for use**

The reactivity of the antibody with cellbound TNF-Receptor is minimally inhibited by high concentrations of TNF. See further instructions for use A and G.

### **Presentation**

0.5 ml purified antibody solution in PBS with approximately 50 µg Ig and 0.1% BSA and 0.1% sodium azide. Also available unconjugated.
