

Mouse TNF-Receptor p55, clone HM104 Monoclonal Antibody

Catalog No.: MON 9064

Quantity: 1 ml

Specificity

The antibody reacts with the extra-cellular part of the mouse TNF-Receptor p55 and with the soluble receptor. TNF-Receptor p55 is present on most celltypes and is considered to play a prominent role in cell stimulation by TNF- α . Induction of cytotoxicity and other most functions are mediated largely via TNF-Receptor p55.

Immunoglobulin type

Rat IgG2a

Use

The antibody is useful for detection of TNF-Receptor p55 by FACS analysis. The reactivity of the antibody with soluble TNF-Receptor is inhibited by high concentrations of both mouse TNF- α and human TNF- α .

Presentation

1 ml (100 μ g/ml) purified antibody solution in PBS, containing 0.02% sodium azide and 0.1% BSA. Purified by protein G affinity chromatography, \geq 98% pure, as determined by SDS PAGE analyses. Membrane filtered (0.22 μ m).

FOR RESEARCH USE ONLY, NOT FOR DRUG, DIAGNOSTIC OR OTHER USE.
