

IL4, Affinity Purified Rat pAb

| | | | |
|---------------------------------|---|------------------|--------|
| Catalog No. | PA0502 | Quantity: | 100 µg |
| Description: | Rabbit Anti-rat IL4 Affinity Purified polyclonal antibody | | |
| Specificity: | Rat | | |
| Host: | Rabbit | | |
| Immunogen: | Recombinant Rat IL-4 | | |
| Formulation: | A sterile filtered antibody solution (1.0 mg/ml) was lyophilized from 0.5X PBS pH 7.4. | | |
| Purification: | Affinity Chromatography | | |
| Reconstitution: | Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of ≤0.2 mg/ml. | | |
| Storage & Stability: | Stable at room temperature for at least one month and for greater than a year when kept at -20°C. When reconstituted according to the above directions, the antibody is stable for at least six weeks at 2-4°C. Avoid repeated freeze-thaw cycles. | | |
| Applications: | <p>ELISA: To detect IL-4 by direct ELISA (using 100 µl/well antibody solution) a concentration of at least 0.5µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with compatible secondary reagents, allows the detection of 0.2-0.4 ng/well of recombinant IL-4.</p> <p>Western Blot: To detect IL-4 by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant IL-4 is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.</p> <p>The optimal concentration should be determined by the user for each specific application.</p> | | |
