

Rabbit Anti-Mouse IL6 Biotin Affinity Purified pAb

Catalog No.	PA0532BT	Quantity:	50 µg
Alternate Names:	Interleukin-6, BSF-2, DIF, IFNB2, IFN-beta-2, ILG6, ILHP1, IL-6		
Description:	Rabbit Anti-mouse IL6 Biotin Affinity Purified polyclonal antibody		
Specificity:	Mouse IL6		
Host:	Rabbit		
Immunogen:	Recombinant mouse IL6		
Conjugate:	Biotin		
Formulation:	Lyophilized from sterile-filtered PBS solution		
Purification:	Biospecific affinity chromatography		
Reconstitution:	Centrifuge vial prior to opening. Add sterile PBS solution containing 0.1% BSA to the vial to fully solubilize the antibody to a concentration of 50 µg/ml.		
Applications:	Western Blot ELISA		
Application Notes:	To detect by Western Blot analysis this antibody can be used at a concentration of 0.1 -0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions. To detect by direct ELISA (using 100 µl/well antibody solution) this antibody can be used at a concentration of 0.15-0.30 µg/ml. Used in conjunction with compatible secondary reagents, allows the detection of at least 0.2 ng/well of recombinant. The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	Lyophilized antibody is stable for 6 months at -20°C. Reconstituted protein is stable for 1 month at 2-4°C or for 6 months in working aliquots at -20°C. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
