

TNF-alpha, Biotin Affinity Purified Human pAb

Catalog No.	PA1262BTG	Quantity:	50 µg
Description:	Goat Anti-human TNF-alpha Biotin Affinity Purified polyclonal antibody		
Specificity:	Human		
Host:	Goat		
Immunogen:	Recombinant Human TNF-alpha		
Formulation:	Lyophilized from sterile-filtered PBS solution.		
Reconstitution:	Centrifuge vial prior to opening. Reconstitute to a concentration of 50 µg/ml with sterile PBS solution containing 0.1% BSA.		
Applications:	<p>ELISA: To detect human TNF-α by direct ELISA (using 100 µl/well antibody solution) this antibody can be used at a concentration of 0.15-0.30 µg/ml. Used in conjunction with compatible secondary reagents, allows the detection of at least 0.2 ng/well of recombinant human TNF-α.</p> <p>Western Blot: To detect human TNF-α by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant human TNF-α is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.</p> <p>The optimal concentration should be determined by the user for each specific application.</p>		
Storage & Stability:	TNF-α lyophilized antibody is stable for at least 6 months when kept at -20°C. The biotinylated antibody should be reconstituted to a concentration of 50 µg/ml with sterile PBS solution containing 0.1% BSA. This solution can be stored at 2-4°C for at least one month without detectable loss of activity. Frozen aliquots of this solution are stable for at least 6 months when kept at -20°C. Avoid more than one freeze-thaw cycle.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
