

Rabbit Anti-Human TNF-alpha Biotin Affinity Purified pAb

Catalog No.	PA1262BT	Quantity:	50 µg
Alternate Names:	Tumor Necrosis Factor-alpha, TNFA, TNFSF1A, TNFSF2, CF, CTNF, CTX, DIF		
Description:	Rabbit Anti-human TNF-alpha Biotin Affinity Purified polyclonal antibody		
Specificity:	Human TNF-alpha		
Host:	Rabbit		
Immunogen:	Recombinant human TNF-alpha		
Conjugate:	Biotin		
Formulation:	Lyophilized from sterile-filtered PBS solution		
Purification:	Biospecific affinity chromatography		
Reconstitution:	Centrifuge vial prior to opening. Add sterile PBS solution containing 0.1% BSA to the vial to fully solubilize the antibody to a concentration of 50 µg/ml.		
Applications:	Western Blot ELISA		
Application Notes:	<p>To detect human TNF-alpha by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant human TNF-alpha is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.</p> <p>To detect human TNF-alpha by direct ELISA (using 100 µl/well antibody solution) this antibody can be used at a concentration of 0.15-0.30 µg/ml. Used in conjunction with compatible secondary reagents, allows the detection of at least 0.2 ng/well of recombinant human TNF-alpha.</p> <p>The optimal concentration should be determined by the user for each specific application.</p>		
Storage & Stability:	Lyophilized antibody is stable for 6 months at -20°C. Reconstituted antibody is stable for 1 month at 2-4°C or for 6 months in working aliquots at -20°C. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
