

Rabbit Anti-rat IGFBP-4 Polyclonal Antiserum

Catalog No.	PAAP1	Quantity:	100 µl
Host:	Rabbit		
Immunogen:	Rat IGFBP-4		
Formulation:	Lyophilized		
Reconstitution:	Centrifuge vial prior to opening. Dissolve in 100 µl sterile water. Dilute in a buffer solution appropriate for the desired application.		
Cross-Reactivity:	The antiserum does not cross-react with horse, human or pig serum.		
Applications:	RIA: working dilution of 1:40,000. Levels of 200 ng/ml can be detected in rat serum or wound fluids. Western blot: working dilution of 1:5,000. The optimal concentration should be determined by the user for each specific application.		
Storage & Stability:	In lyophilized form, the antiserum is stable to at least 2 years at 2-4°C. After reconstitution, aliquot and store at -20°C. Avoid repeated freeze-thaw cycles.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
