

## **Rabbit Anti-human CD120a, TNF-Receptor p55 Polyclonal Antibody**

**Catalog No.:** PS053

**Quantity:** 1 ml

### **Specificity**

The antibodies react with the extra cellular part of the TNF-Receptor p55 and with the soluble receptor. TNF-Receptor p55 is present on most cell types and is considered to play a prominent role in cell stimulation by TNF: induction of cytotoxicity and other most functions are mediated largely via TNF-Receptor p55.

### **Use**

The antibody is useful for detection of TNF-Receptor p55.

### **Instructions for use**

The reactivity of the antibodies with soluble TNF-Receptor is not inhibited by high concentrations of TNF, also applicable on Western Blotting.

### **Presentation**

1 ml purified antibody solution with 100 µg IgG/ml and 0.1% BSA and 0.1% sodium azide in PBS.

**FOR RESEARCH USE ONLY, NOT FOR DRUG, DIAGNOSTIC OR OTHER USE**
