Native Rat Hemopexin

Catalog No.	CNR000A CNR000B CNR000C	Quantity:	100 µg 500 µg 1.0 mg
Alternate Names:	Hemopexin, Beta-1B-glycoprotein, HPX, Haemopexin.		
Description:	Hemopexin is a single-chain protein belonging to the family of blood transport proteins. It binds to heme released into the bloodstream during the degradation process. Recent studies have demonstrated that hemopexin acts as an extracellular antioxidant against hemoglobin-mediated damage in inflammation. Hemopexin protects against heme toxicity and conserves and recycles iron. Abnormal levels of hemopexin are associated with hemolytic anemia, chronic neuromuscular disease, and acute intermittent porphyria.
