

BCL2 (aa 140-239), Human Recombinant with GST Tag

Catalog No.	CRB124	Quantity:	25 µg
Alternate Names:	B-cell CLL/lymphoma 2		
Description:	Recombinant Human BCL2 (aa 140-239) partial protein with N-terminal GST Tag has a Gene ID of BCL2 (596). This gene encodes an integral outer mitochondrial membrane protein that blocks the apoptotic death of some cells such as lymphocytes. Constitutive expression of BCL2, such as in the case of translocation of BCL2 to Ig heavy chain locus, is thought to be the cause of follicular lymphoma. Two transcript variants, produced by alternate splicing, differ in their C-terminal ends.		
Concentration:	0.036 mg/ml		
Source:	<i>In vitro</i> Wheat Germ expression system		
Molecular Weight:	37 kDa		
Formulation:	Sterile filtered liquid in a buffer of 50 mM Tris-HCl + 10 mM reduced Glutathione, pH 8.0.		
Storage & Stability:	Store at -80°C. Aliquot to avoid repeated freezing and thawing. Product is best used within three months from date of receipt.		
Applications:	Western Blot ELISA Antibody production Array		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
