ICOSLG

Recombinant Human ICOS Ligand / B7-H2 / CD275 (Fc Tag)

Catalog No. CRH638A-Fc Quantity: 100 μg

CRH638B-Fc 200 μg

Alternate Names: ICOS ligand, B7 homolog 2, B7-H2, B7-like protein Gl50, B7-related protein 1, B7RP-1,

CD275

Description: Inducible co-stimulator ligand (ICOSL), also known as B7-H2, is a member of the B7

family of co-stimulatory molecules related to B7-1 and B7-2. It is a transmembrane glycoprotein with extracellular IgV and IgC domains, and binds to ICOS on activated T cells, thus delivers a positive costimulatory signal for optimal T cell function. The structural features of ICOSL are crucial for its costimulatory function. Present study shows that ICOSL displays a marked oligomerization potential, resembling more like B7-1 than B7-2. B7-H2-dependent signaling may play an active role in a proliferative response rather than in cytokine and chemokine production. The CD28/B7 and ICOS/B7-

H2 pathways are both critical for costimulating T cell immune responses. Deficiency in either pathway results in defective T cell activation, cytokine production and germinal

center formation.

UniProt ID: 075144-1

Protein Construction: A DNA sequence encoding the human ICOSLG (Met1-Ser258) was expressed with the

Fc region of human IgG1 at the C-terminus.

Source: HEK293 Cells

Formulation: Lyophilized from sterile PBS, pH 7.4.

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants

before lyophilization.

Molecular Weight: The rhICOSLG/Fc is a disulfide-linked homodimer. The reduced monomer comprises 481

aa with a predicted MW of 53.7 kDa and migrates at ~66-76kDa and ~33 kDa in SDS-

PAGE under reducing conditions.

Purity: > 95 % as determined by SDS-PAGE.

Endotoxin Level: < 1.0 EU per μg of the protein as determined by the LAL method

Biological Activity: Testing in progress

Predicted N-terminal: Asp 19

Reconstitution: Centrifuge vial prior to opening. Add sterile distilled water to a concentration of 0.1

mg/mL and gently pipette the solution up and down the sides of the vial. **DO NOT VORTEX**. Allow several minutes for complete reconstitution.

Storage & Stability: Stable for up to 1 year from date of receipt at -20°C to -80°C

After reconstitution, store working aliquots at -20°C to -80°C.
