Icosig

Recombinant Mouse ICOS Ligand / B7-H2 / CD275 (His Tag)

Catalog No.CRM567A-HisQuantity:100 μg

CRM567B-His 200 μg

Alternate Names: ICOS ligand, B7 homolog 2, B7-H2, B7-like protein Gl50, B7-related protein 1, B7RP-1,

LICOS, CD275

Description: Inducible co-stimulator ligand (ICOSL), also known as B7-H2, is a member of the B7

family of co-stimulatory molecules related to B7-1 and B7-2. It is a transmembrane glycoprotein with extracellular IgV and IgC domains, and binds to ICOS on activated T cells, thus delivers a positive costimulatory signal for optimal T cell function. The structural features of ICOSL are crucial for its costimulatory function. Present study shows that ICOSL displays a marked oligomerization potential, resembling more like B7-1 than B7-2. B7-H2-dependent signaling may play an active role in a proliferative response rather than in cytokine and chemokine production. The CD28/B7 and ICOS/B7-H2 pathways are both critical for costimulating T cell immune responses. Deficiency in either pathway results in defective T cell activation, cytokine production and germinal

center formation.

UniProt ID: Q9JHJ8

Accession Number: NP 056605.1

Protein Construction: A DNA sequence encoding the mouse B7-H2 extracellular domain (Met 1-Lys 279) was

fused with a polyhistidine tag at the C-terminus.

Source: HEK293 Cells

Formulation: Lyophilized from sterile PBS, pH 7.4

Normally 5 % - 8 % trehalose, mannitol and 0.01% Tween80 are added as protectants

E-mail: info@cellsciences.com

Website:

www.cellsciences.com

before lyophilization.

Molecular Weight: The rmB7-H2 consists of 244 aa with a predicted MW of 27.8 kDa and migrates at ~45

-55 kDa in SDS-PAGE under reducing conditions, due to glycosylation.

Purity: > 95 % as determined by SDS-PAGE.

Endotoxin Level: < 1.0 EU per μg of the protein as determined by the LAL method

Biological Activity: In a functional ELISA, immobilized mouse B7-H2 at 1 μg/ml (100 μl/well) can bind human

ICOS with a linear range of 40-1000 ng/ml.

Predicted N-terminal: Glu 47

Reconstitution: Centrifuge vial prior to opening. Add sterile distilled water to a concentration of 0.1

mg/mL and gently pipette the solution up and down the sides of the vial. **DO NOT VORTEX**. Allow several minutes for complete reconstitution.

Storage & Stability: Stable for up to 1 year from date of receipt at -20°C to -80°C

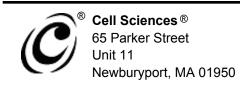

After reconstitution, store working aliquots at -20°C to -80°C.

Toll Free: 888-769-1246

Phone: 978-572-1070

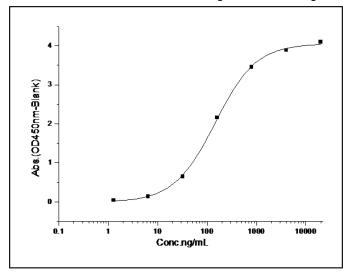

Fax: 978-992-0298

Avoid repeated freeze-thaw cycles.

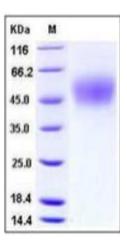

cellsciences.com

Measured by its binding ability in a functional ELISA. Immobilized mouse B7-H2 at 1 μ g/ml (100 μ l/well) can bind human ICOS with a linear range of 40-1000 ng/ml.

SDS-PAGE

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
