

AREG

Recombinant Human Amphiregulin

Catalog No.	CS273A CS273B CS273C	Quantity:	10 µg 50 µg 1 mg
Alternate Names:	AREG, Colorectum cell-derived growth factor, CRDGF, Schwannoma-derived growth factor, SDGF		
Description:	Amphiregulin is an EGF related growth factor that signals through the EGF/TGF-α receptor, and stimulates growth of keratinocytes, epithelial cells and some fibroblasts. Amphiregulin also inhibits the growth of certain carcinoma cell lines. Synthesized as a transmembrane protein, Amphiregulin's extracellular domain is proteolytically processed to release the mature protein. There are 6 conserved cysteine residues, which form 3 intramolecular disulfide bonds essential for biological activity.
