Description: CX3C chemokine receptor 1 (CX3CR1), also known as the fractalkine receptor or G-protein coupled receptor 13 (GPR13), is the receptor for the chemokine CX3CL1 (also called neurotactin or fractalkine). CX3CR1 is expressed specifically on T cells, natural killer cells and monocytes

The receptor is available in the following formats: stable over-expression cell line, membrane preparation, or purified receptor in HEK293 or CHO. Various tagged versions are available.

Gene ID: 1524

UniProtKB: P49238

Format: Cell line, membrane preparation, or purified protein

Source: HEK 293 or CHO cells

Characterization: Expression of receptor was verified by immunostaining. Receptor demonstrates biological activity when tested in a radioligand assay.

Affinity Tag Options: Receptor construct: CX3CR1 is available in 2xTwinStrep-tag with HIS-tag
