

AMBP

Native Human Alpha 1 Microglobulin Protein Partially Purified

Catalog No.	CSI13534	Quantity:	1.0 mg
Alternate Names:	alpha-1 Microglobulin protein, A1MG protein		
Description:	Purified native Human alpha 1 Microglobulin protein - A1M is a highly glycosylated protein of 27 kDa with a heterogenous charge which forms complexes with IgA and Albumin. High levels of A1M in urine are a good indicator of renal tubular dysfunction.		
GeneID:	259		
Source:	Urine from tubular proteinuria patients		
Molecular Weight:	27 kDa		
Formulation:	Lyophilized from 0.02M NH_4HCO_3 .		
Purity:	40-90% pure		
Applications:	User optimized		
Storage & Stability:	Store at 4 °C.		
Contaminants:	None detected by SDS PAGE analysis		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
