

Human Ascites Fluid, Single Donor

Catalog No.	CSI19632A CSI19632C	Quantity:	25 ml 1 liter
Description:	Ascites, also known as peritoneal cavity fluid, peritoneal fluid excess, hydroperitoneum, is an accumulation of fluid in the peritoneal cavity. Although most commonly due to cirrhosis and severe liver disease, its presence can portend other significant medical problems. Diagnosis of the cause is usually with blood tests, an ultrasound scan of the abdomen, and direct removal of the fluid by needle or paracentesis.		
Source:	Peritoneal fluid from a single donor.		
Appearance:	Clear to pale yellow.		
Formulation:	Frozen Liquid - unprocessed, non-sterile, without preservatives		
Storage & Stability:	Store at -20°C to -80°C. Recommended upon initial thaw to prepare working aliquots and store at -20°C to -80°C. Avoid multiple freeze/thaw cycles.		
Certification:	Not tested for infectious diseases. This material should be handled at the Biosafety Level 2 (BSL 2) as recommended for any potentially infectious human serum or blood specimen in the CDC/NIH manual "Biosafety in Microbiological and Biomedical Laboratories", 2009.		

NOT FOR HUMAN USE. FOR RESEARCH ONLY. NOT FOR DIAGNOSTIC OR THERAPEUTIC USE.
