IGF1

Recombinant Human LR3 Insulin-like Growth Factor 1

Catalog No. LRM001 Quantity: 1.0 mg

LRM005 5.0mg LRM020 20 mg LRM050 50 mg

Alternate Names: Lr3 IGF-1, LR3 IGF, IGF LR3, LArg3 IGF-1

Description: IGF-1 belongs to the insulin gene family and is a mitogenic polypeptide growth factor that

stimulates the proliferation and survival of various cell types, including muscle, bone, and

cartilage tissue.

LR3 IGF-1 is a long-acting analog of human IGF-1 specifically designed and manufactured for mammalian cell culture to support large-scale manufacturing of recombinant biopharmaceuticals. It differs from native IGF-1 in that it possesses an arginine instead of a glutamic acid at the third position in its amino acid sequence

("arginine 3"), and also has an additional 13 amino acids at N-terminus

(MFPAMPLLSLFVN) ("long"), for a total of 83 amino acids (relative to the 70 of IGF-1).

Gene ID: Analog of 3479

Source: E. coli

Molecular Weight: 9.1 kDa (83 aa)

Formulation: Lyophilized from sterile-filtered 20 mM phosphate buffer, pH 7.2.

Purity: >98% by SDS-PAGE analysis

>90% by RP-HPLC

Endotoxin Level: <0.01 EU/µg

Biological Activity: $ED_{50} \sim 0.3-1.5 \text{ ng/ml}$, determined in a serum-free cell proliferation assay using human

MCF-7 cells

ED₅₀ <10 ng/ml, determined by the stimulation of protein synthesis in rat L6 myoblasts.

Specific Activity: > 6.7 × 105 IU/mg, by serum-free cell proliferation assay using human MCF-7 cells

>1.0 x 10⁵ IU/mg, by the stimulation of protein synthesis in rat L6 myoblasts

Amino Acid Sequence: MFPAMPLSSL FVNGPRTLCG AELVDALQFV CGDRGFYFNK PTGYGSSSRR

APQTGIVDEC CFRSCDLRRL EMYCAPLKPA KSA

Reconstitution: Centrifuge vial prior to opening. Add sterile distilled water or aqueous buffer containing

0.1% BSA to a concentration of 0.1-1.0 mg/mL. Further dilutions should be made in

appropriate buffered solutions.

Storage & Stability: Upon receipt, the lyophilized protein is stable for one year when stored at -20 °C to -80 °
