

Mouse Monoclonal Anti-Ovalbumin IgM Antibody

Catalog # 7097

For Research Use Only - Not Human or Therapeutic Use

DESCRIPTION:	Mouse anti-Ovalbumin (OVA) IgM monoclonal antibody, clone 2H11A8, unconjugated
APPLICATION:	Use for ELISA
QUANTITY:	100 µl, 1 mg/ml
FORM:	Dissolved in PBS, pH 7.2
SOURCE:	Mouse
REACTIVITY:	Reacts to native OVA only. Does not react to denatured OVA and OVA peptides.
IMMUNOGEN:	Native OVA
PURITY:	Ion-chromatography purified
SUBTYPE:	Mouse IgM
USAGE:	Dilute the antibody in buffer containing 2% heterologous serum, such as normal goat serum, to prevent non-specific reactions in ELISA
STORAGE TEMPERATURE:	-20°C
STABILITY:	1 year
