Product Data Sheet

Western blot analysis of IL-12A expression in MDA-MB231 (A) whole cell lysates.

Immunohistochemical analysis of IL-12A staining in human prostate cancer formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugad compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
