Product Data Sheet

Western blot analysis of CEP135 expression in HEK293T (A), mouse lung (B), mouse heart (C) whole cell lysates.

Immunohistochemical analysis of CEP135 staining in human brain formalin fixed paraffin embedded tissue section. The section was pre-treated using heat mediated antigen retrieval with sodium citrate buffer (pH 6.0). The section was then incubated with the antibody at room temperature and detected using an HRP conjugate compact polymer system. DAB was used as the chromogen. The section was then counterstained with haematoxylin and mounted with DPX.
