

Recombinant Bovine IL-10

Cat. No. IL10-37B **Lot. No.** (See product label)

SPECIFICATION

Product Overview	Bovine IL-10 was produced in yeast and therefore does not have endotoxin, is naturally folded, and post-translationally modified.
Description	The IL-10 family of cytokines consists of nine members: IL-10, IL-19, IL-20, IL-22, IL-24, IL-26, IL-28A, IL-28B, and IL-29. These cytokines elicit diverse host defense mechanisms. IL-10 family cytokines are essential for maintaining the integrity and homeostasis of tissue epithelial layers. By promoting innate immune response, members of this family can limit the damage caused by viral and bacterial infections. They can also facilitate the tissue-healing process in injuries caused by infection or inflammation. IL-10 itself is an anti-inflammatory cytokine. IL-10 family cytokines have indispensable functions in many infectious and inflammatory diseases.
Source	Yeast
Species	Bovine
Form	Lyophilized
Molecular Mass	18.6 kDa
AA Sequence	SRDASTLSDSSCIHLPTSLPHMLRE LRAAFGKVKTFFQMKDQLHSLLLTQ SLLDDFKGYLGCQALSEMIQFYLEE VMPQAENHGPDIKEHVNSLGEKLKT LRLRLRRCHRFLPCENKSKEAVEVKV RVFSELQERGVYKAMSEFDIFINYI ETYMTTKMQK (160)

 45-1 Ramsey Road, Shirley, NY 11967, USA

1/2

For Research Use Only

Applications

The Bovine IL-10 protein can be used in cell culture, as an IL-10 ELISA Standard, and as a Western Blot Control.

Storage

-20 C
