

## Recombinant Ovine IL-8 (CXCL8)

**Cat. No.** IL8-48O    **Lot. No.** (See product label)

### SPECIFICATION

<b>Product Overview</b>	Guinea Pig IL-8 was produced in yeast and therefore does not have endotoxin, is naturally folded, and post-translationally modified.
<b>Description</b>	Interleukin-8 (IL-8), also known as CXCL8, is a CXC family member chemokine produced by macrophages and other cell types such as epithelial cells. There have been 17 different CXC chemokines described in mammals, that are subdivided into two categories, those with a specific amino acid sequence (or motif) of glutamic acid-leucine-arginine (or ELR for short) immediately before the first cysteine of the CXC motif (ELR-positive), and those without an ELR motif (ELR-negative). ELR-positive CXC chemokines such as IL-8 specifically induce the migration of neutrophils, and interact with chemokine receptors CXCR1 and CXCR2.
<b>Source</b>	Yeast
<b>Species</b>	Ovine
<b>Form</b>	Lyophilized
<b>Molecular Mass</b>	9.1 kDa
<b>AA Sequence</b>	AVLSRMSTEL RCQCIKTHST PFHPKFIKEL RVIESGPHE NSEIIVKLTN GKEVCLDPKE KWVQKVQQAF LKRAEKQDP (79)
<b>Applications</b>	The Ovine IL-8 protein can be used in cell culture, as an IL-8 ELISA Standard, and as a Western Blot Control.
