

Product Information

Recombinant Human FN1, His tagged

Product Information

| | |
|-------------------------|---|
| Catalog# | MK0389H |
| Product Name | Recombinant Human FN1, His tagged |
| Product Overview | Recombinant Human FN1 Fragment 2 (Ser 607-Pro 1265) (CAD91166), fused with a C-terminal polyhistidine tag, was produced in Human Cell. |
| Description | Purified Recombinant Human Fibronectin 1, His-tagged from Creative Biomart. FN1, His-tagged(Human)(FN1, Fibronectin). |
| Source | HEK293 cells |
| Species | Human |
| Tag | His |
| Formulation | Lyophilized from a sterile solution of PBS, pH 7.2. |
| Storage | Store under sterile conditions at -20°C to -80°C. Avoid repeated freeze-thaw cycles. |
| Reconstitution | It is recommended that sterile water be added to the vial to prepare a stock solution. Centrifuge the vial at 4°C before opening to recover the entire contents. |
| Molecular Mass | The secreted recombinant human Fibronectin 1 fragment2 (FN1.2) consists of 670 amino acids and has a calculated molecular mass of 73.2 kDa. As a result of glycosylation, rhFN1.2 migrates as an approximately 85-100 kDa band in SDS-PAGE under reducing conditions. |
| Stability | Samples are stable for up to twelve months from date of receipt at -70°C. |
| Endotoxin | Less than 1.0 EU per µg as determined by the LAL method. |
| Notes | Research Use Only. Not for use in clinical procedures. Avoid repeated freeze-thaw cycles. |
