

## PreDictor RoboColumn MabSelect Xtra

### Product Information

**Cat#No#** Pr-045P

### Product Overview

These PreDictor RoboColumn minicolumns are prepacked with MabSelect Xtra, a protein A chromatography resin with very high dynamic binding capacity for effective capture of monoclonal antibodies (mAbs).

### Description

PreDictor RoboColumn units are prepacked, miniaturized columns that support HTPD using a robotic liquid handling workstation, such as Freedom Evo from Tecan, for fully automated and parallel chromatographic separations. Perform HTPD work using PreDictor RoboColumn units, alone or as a complement to PreDictor 96-well filter plates.

### Characteristic

Supports high-throughput process development (HTPD) by allowing parallel screening of chromatographic conditions using a miniaturized column format and robotic workstation.

Facilitates screening of a wide range of parameters with small sample consumption.

Prepacked with a range of our BioProcess chromatography resins.

Automation and parallel screening reduce experimental time and minimize hands-on time.

High-throughput workflow allows investigation of enlarged experimental workspace for better process understanding.

### Maximum operating pressure

Up to 8.0 bar

### Recommended flow rate

16 to 1000 cm/h

### Recommended column height

39 mm

### Chemical stability

Commonly used aqueous buffers, pH 1 to 14, organic solvents.

## PreDictor RoboColumn MabSelect Xtra

---

**Temperature stability**

4°C to 30°C

---

**Storage**

2°C to 8°C

---

**Pack size**

200 µL
