

PreDictor RoboColumn Capto Blue

Product Information

Cat#No# Pr-083P

Product Overview

These PreDictor RoboColumn minicolumns are prepacked with Capto Blue, an affinity resin with outstanding pressure and flow properties for capture of albumin, coagulation factors, enzymes, and recombinant proteins.

Description

PreDictor RoboColumn units are prepacked, miniaturized columns that support HTPD using a robotic liquid handling workstation, such as Freedom Evo from Tecan, for fully automated and parallel chromatographic separations. Perform HTPD work using PreDictor RoboColumn units, alone or as a complement to PreDictor 96-well filter plates.

Characteristic

Supports high-throughput process development (HTPD) by allowing parallel screening of chromatographic conditions using a miniaturized column format and robotic workstation.

Facilitates screening of a wide range of parameters with small sample consumption.

Prepacked with 200 or 600 μ L of chromatography resin.

Automation and parallel screening reduce experimental time and minimize hands-on time.

High-throughput workflow allows investigation of enlarged experimental workspace for better process understanding.

Maximum operating pressure

Up to 8.0 bar

Recommended flow rate

16 to 1000 cm/h

Recommended column height

39 mm

Chemical stability

Commonly used aqueous buffers, pH 1 to 14, organic solvents.

PreDictor RoboColumn Capto Blue

Temperature stability

4°C to 30°C

Storage

2°C to 8°C

Pack size

200 µL
