

## PreDicator RoboColumn VIISelect

### Product Information

**Cat#No#** Pr-085P

### Product Overview

These PreDicator RoboColumn minicolumns are prepacked with VIISelect, an affinity chromatography resin designed for the purification of Factor VII/VIIa coagulation factors.

### Description

PreDicator RoboColumn units are prepacked, miniaturized columns that support HTPD using a robotic liquid handling workstation, such as Freedom Evo from Tecan, for fully automated and parallel chromatographic separations. Perform HTPD work using PreDicator RoboColumn units, alone or as a complement to PreDicator 96-well filter plates.

### Characteristic

Supports high-throughput process development (HTPD) by allowing parallel screening of chromatographic conditions using a miniaturized column format and robotic workstation.

Facilitates screening of a wide range of parameters with small sample consumption.

Prepacked with 200 or 600 µL of chromatography resin.

Automation and parallel screening reduce experimental time and minimize hands-on time.

High-throughput workflow allows investigation of enlarged experimental workspace for better process understanding.

### Maximum operating pressure

Up to 8.0 bar

### Recommended flow rate

16 to 1000 cm/h

### Recommended column height

39 mm

### Chemical stability

Commonly used aqueous buffers, pH 1 to 14, organic solvents.

## PreDicator RoboColumn VIISelect

**Temperature stability**

---

4°C to 30°C

---

**Storage**

---

2°C to 8°C

---

**Pack size**

---

200 µL

---
