

# SP Sepharose Fast Flow in ReadyToProcess columns

## Product Information

**Cat#No#** SP-276P

### Product Overview

These ReadyToProcess chromatography columns are prepacked with SP Sepharose Fast Flow (FF) chromatography resin. ReadyToProcess columns are validated high-performance bioprocessing columns that are supplied prepacked and ready for use.

### Characteristic

Well-proven, strong cation exchanger developed for industrial downstream processes.

Used extensively for capture and intermediate purification of a wide range of approved biopharmaceuticals.

High chemical stability allows for well-proven cleaning-in-place (CIP) and sanitization protocols.

The hydrophilic nature of the base matrix ensures low levels of non-specific binding leading to low levels of host cell-derived impurities in the elution pool.

### Applications

For manufacturing of biopharmaceuticals for clinical phase I and II studies. Depending on the scale of operations, they can also be used for full-scale manufacturing, as well as for preclinical studies.

### Maximum operating pressure

1.2 bar [0.12 MPa] (17 psi)

### Recommended column height

200 mm (7.87 in)

### Storage

4°C to 30°C, 20 % EtOH + 0.2 M Sodium Acetate

### Pack size

2.5 L

### Dimensions

126 x 200 mm
