

Guinea Pig Complement Serum

Cat. No.: CTS-001

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview This product is a Complement Serum freshly prepared from Guinea pig whole blood in cold and then frozen at -80°C to prevent degradation of complement activity. It can be used in the hemolytic plaque assays, complement fixation assays, and other lymphocytotoxicity and hemolytic procedures. This product is for research use only and is not intended for therapeutic or diagnostic applications.
