

FD removed Human Complement Serum

Cat. No.: CTS-049

This product is for research use only and is not intended for diagnostic use.

PRODUCT INFORMATION

Product Overview This product is a Factor D removed human complement serum via immunoaffinity chromatography. It can be used for testing the absence of Factor D by functional assays for alternative pathway activity. It can be reconstituted by addition of purified Factor D protein. This product is for research use only and is not intended for therapeutic or diagnostic applications.

SPECIFICATIONS

Specie Reactivity	Human
Type	Serum
Application	Functional Assays
Product Form	Frozen liquid
Storage	Store at -80°C. Avoid repeated freeze/thaw cycles.
Complement Activity	Depleted Special Protein
