

Exosome Isolation Kit (For Serum/Plasma)

Cat. No.: EIK-02

This product is for research use only and is not intended for diagnostic use.

Size	30 reactions; 50 reactions
Storage Conditions	RT/2-8°C, Store separately according to different components of the kit
Shipment Conditions	Gel Pack
Sample Type	Serum/Plasma
Application	Exosome isolation and purification from serum or plasma
Product Introduction	This product is a rapid and convenient method for the efficient isolation and purification of exosomes from serum or plasma. The kit produces highly pure exosomes using filtration method as compared to exosome precipitation methods.

Package Contents	Product Components	30 assays	50 assays	Part Number	Storage Conditions
	Exosome Extraction Reagent	4 ml	10 ml	EIK-02-01	2-8°C
	Sample Solution	10 ml	20 ml	EIK-02-02	2-8°C
	Filter Spin Columns/Collection Tubes 1.5 ml	30	50	EIK-02-03	RT
