

## Exosome Capture and Isolation Kits (For Cell Culture Media/Urine) (CD9)

Cat. No.: EIK-06

This product is for research use only and is not intended for diagnostic use.

<b>Size</b>	10 reactions
<b>Storage Conditions</b>	2-8°C, Do not freeze!
<b>Shipment Conditions</b>	Gel Pack
<b>Sample Type</b>	Cell Culture Media/Urine
<b>Application</b>	Exosome capture and isolation from cell culture supernatant or urine. The isolated exosomes can be used for Western Blot, Transmission Electron Microscopy, Flow Cytometry, Labeling& Tracking and qRT-PCR, etc.

**Product Introduction** This product is a rapid and convenient method for the efficient capture and isolation of exosomes from cell culture supernatant or urine. The kit is for the selective capture distinct sub-populations of exosomes based on CD9 surface markers.

Package Contents	Product Components	Volume	Part Number	Storage Conditions
	CD9 Capture Beads (Beads diameter: 1.0 µm Solid content: 10 mg/mL)	1.0 ml	EIK-06-01	2-8°C
	Washing Buffer	30 ml	EIK-06-02	2-8°C
	Exosome Elution Buffer	0.5 ml	EIK-06-03	2-8°C

**User Supplied Reagents and Equipment** Glass tubes  
PBS buffer
