

Rhesus Monkey Breast Milk

Cat. No.: NHP-BF008

This product is for research use only and is not intended for diagnostic use.

In biology and medicine research, the Rhesus monkey is commonly used because of its high similarity to humans. This offered product is obtained from Rhesus monkeys' mammary glands. The sample is high-quality and offered in a cryopreserved or fresh state and can play an important role in lots of tests and assays including PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy rhesus monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Breast milk is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained milk does not contain contamination and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
