

Cynomolgus Monkey Urine

Cat. No.: NHP-BF015

This product is for research use only and is not intended for diagnostic use.

Cynomolgus monkey is commonly used in the medical research field, which often involves neuroscience and disease research. The product is high-quality and collected from cynomolgus monkeys. The available sample is stored in cryopreserved or fresh forms and can be used to perform varieties of tests and assays including PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Urine is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained urine without any direct intervention does not contain contamination with feces or animal feeds and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
