

Cynomolgus Monkey Breast Milk

Cat. No.: NHP-BF022

This product is for research use only and is not intended for diagnostic use.

In scientific research, the Cynomolgus monkey is often used in neuroscience and disease-related experiments. This available product is collected from Cynomolgus monkeys' mammary glands. The sample is high-quality and offered in a cryopreserved or fresh form. It can be applied to a number of tests and assays, for example, PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Breast milk is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained milk does not contain contamination and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
