

Cynomolgus Monkey Bone Marrow Aspirate

Cat. No.: NHP-BF023

This product is for research use only and is not intended for diagnostic use.

In scientific research, the Cynomolgus monkey is often used in neuroscience and disease-related experiments. This product is sampled from Cynomolgus monkeys bone tissue. The sample is high-quality and offered in a cryopreserved or fresh form and is usually used in a series of test and assay experiments such as PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Bone marrow aspirate is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained from the bone marrow cavity through a special needle, bone marrow aspirate does not contain contamination and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
