

Cynomolgus Monkey Bile

Cat. No.: NHP-BF024

This product is for research use only and is not intended for diagnostic use.

Cynomolgus monkey is commonly used in the medical research field, which often involves neuroscience and disease research. This product is sampled from Rhesus monkeys' liver tissue. The sample is high-quality and offered in a cryopreserved or fresh form and is usually used in a series of test and assay experiments such as PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Bile is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained through direct surgical cannulation, bile does not contain other contamination and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
