

Cynomolgus Monkey Aqueous Humor

Cat. No.: NHP-BF025

This product is for research use only and is not intended for diagnostic use.

In scientific research, the Cynomolgus monkey is often used in neuroscience and disease-related experiments. The vitreous humor product is obtained from the eyes of SPF Cynomolgus monkeys. The offered sample from Creative Biolabs is in a cryopreserved or fresh state and can be used to conduct a series of test and assay procedures such as PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy cynomolgus monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Aqueous humor is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained aqueous humor does not contain other contamination and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
