

Chimpanzee Urine

Cat. No.: NHP-BF028

This product is for research use only and is not intended for diagnostic use.

Chimpanzees are social animals most closely related to the human, they could be used in biomedical research repeatedly over decades. This product is collect from Chimpanzees. The sample is available as cryopreserved or fresh, and can be used for a variety of tests and assays such as PCR, Western blot, immunoprecipitation, immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy chimpanzee
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Urine is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained urine without any direct intervention does not contain contamination with feces or animal feeds and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
