

African Green Monkey Vitreous Humor

Cat. No.: NHP-BF047

This product is for research use only and is not intended for diagnostic use.

African Green Monkey, similar to the Rhesus monkey, is commonly used as a suitable NHP model for scientific research. This vitreous humor product is collected from the eyes of African Green Monkeys. The offered sample is in a cryopreserved or fresh state and can be used as a useful tool for understanding mediators of disease, including inflammatory molecules such as IL-6 and IL-8.

Detailed Product Description

Source	Healthy African green monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Vitreous humor is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained vitreous humor does not contain other contamination and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
