

African Green Monkey Urine

Cat. No.: NHP-BF048

This product is for research use only and is not intended for diagnostic use.

African Green monkey has been considered as one of the most suitable NHP models for biomedical research which is highly close to Rhesus monkey. The product is high-quality and collected from african green monkey. The available sample is stored in cryopreserved or fresh forms and can be used to perform varieties of tests and assays including PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy African green monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Urine is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained urine without any direct intervention does not contain contamination with feces or animal feeds and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
