

## African Green Monkey Saliva

Cat. No.: NHP-BF049

This product is for research use only and is not intended for diagnostic use.

African Green monkey has been considered as one of the most suitable NHP models for biomedical research which is highly close to Rhesus monkey. This available product is collected from african green monkeys' oral cavity. The sample is high-quality and offered in a cryopreserved or fresh form. It can be applied to a number of tests and assays, for example, PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

## **Detailed Product Description**

Source Healthy African green monkey

**Purity** Free of foreign impurities.

Applications Suitable for various research fields including biomarker research, pharmacology, and

toxicology.

**Storage Conditions** Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

## **Technical Specifications**

**Collection Method** Saliva is collected from rigorously screened healthy donors, and the collection process

strictly adheres to animal welfare requirements. Obtained from the mouth through a

noninvasive method, saliva does not contain other contamination and serves as a primary

source for biomarkers.

**Quality Control** Strict accordance with biomedical standards.
