

African Green Monkey Cerebrospinal Fluid (CSF)

Cat. No.: NHP-BF052

This product is for research use only and is not intended for diagnostic use.

African Green monkey has been considered as one of the most suitable NHP models for biomedical research which is highly close to Rhesus monkey. This offered product is obtained from african green monkeys' brains and spinal cords. The sample is high-quality and offered in a cryopreserved or fresh state and can play an important role in lots of tests and assays including PCR, WB, immunoprecipitation, and immunofluorescent flow cytometry.

Detailed Product Description

Source	Healthy African green monkey
Purity	Free of foreign impurities.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Cerebrospinal fluid is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained through a special spinal needle, cerebrospinal fluid does not contain contamination and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
