

## African Green Monkey Aqueous Humor

**Cat. No.: NHP-BF055**

**This product is for research use only and is not intended for diagnostic use.**

African Green monkey has been considered as one of the most suitable NHP models for biomedical research which is highly close to Rhesus monkey. The monkey's vitreous humor product is obtained from the eyes. The available sample is in a cryopreserved or fresh state and can be used as a helpful tool for a number of tests and assays.

### Detailed Product Description

<b>Source</b>	Healthy African green monkey
<b>Purity</b>	Free of foreign impurities.
<b>Applications</b>	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
<b>Storage Conditions</b>	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

### Technical Specifications

<b>Collection Method</b>	Aqueous humor is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained aqueous humor does not contain other contamination and serves as a primary source for biomarkers.
<b>Quality Control</b>	Strict accordance with biomedical standards.
<b>Available Formats</b>	Frozen
