

Rhesus Monkey Serum

Cat. No.: NHP-BP002

This product is for research use only and is not intended for diagnostic use.

Rhesus monkey is often used in biological and medical research related to human and animal diseases even space travel due to its high closeness to humans. This monkey-derived product is collected from Rhesus monkeys. The sample is confirmed as negative for Herpes B Virus, retroviruses, SIV, SRV, and STLV. It can be used as a tool in a life science laboratory to conduct biochemical experiments such as blocking, ELISA, ICC/IF, IHC, and WB.

Detailed Product Description

Source	Healthy rhesus monkey
Purity	No hemolysis or clotting.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Serum is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained through centrifugation processing of non-anticoagulated whole blood, serum does not contain fibrinogen or other clotting factors and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
