

Baboon Serum

Cat. No.: NHP-BP004

This product is for research use only and is not intended for diagnostic use.

Baboons are a kind of large and robust monkeys with orthographic processing abilities. This monkey-derived product is collected from Baboon's veins or arteries tissue. The sample is high-quality and has been confirmed as negative for Herpes B Virus, retroviruses, SIV, SRV, & STLV. It can be applied in a life science laboratory to carry out biochemical experiments including PCR, WB, immunoprecipitation, immunofluorescent flow cytometry, and Biomarker Discovery.

Detailed Product Description

Source	Healthy baboon
Purity	No hemolysis or clotting.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Serum is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained through centrifugation processing of non-anticoagulated whole blood, serum does not contain fibrinogen or other clotting factors and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
