

Chimpanzee Serum

Cat. No.: NHP-BP005

This product is for research use only and is not intended for diagnostic use.

Chimpanzees are an NHP that are most closely related to humans and are frequently used in biomedical research over decades. This serum product is collected from Chimpanzees' Veins or arteries tissue. The available sample has been excluded from Herpes B Virus, retroviruses, SIV, SRV, and STLV infections. It can be applied in a life science laboratory to perform a series of biochemical procedures including blocking, ELISA, ICC/IF, WB, double radial immunodiffusion, and electro-immunodiffusion.

Detailed Product Description

Source	Healthy chimpanzee
Purity	No hemolysis or clotting.
Applications	Suitable for various research fields including biomarker research, pharmacology, and toxicology.
Storage Conditions	Store at -20 °C or -80 °C. Avoid freeze-thaw cycle.

Technical Specifications

Collection Method	Serum is collected from rigorously screened healthy donors, and the collection process strictly adheres to animal welfare requirements. Obtained through centrifugation processing of non-anticoagulated whole blood, serum does not contain fibrinogen or other clotting factors and serves as a primary source for biomarkers.
Quality Control	Strict accordance with biomedical standards.
Available Formats	Frozen
